

FOIL SETUP GUIDE

INSTRUCTIONS

- > Use this file as a visual guide to see how to correctly set up your artwork for foil printing.
- > Hide or show each layer to see how each element has been set up in the template.
- > The '**PRINTED EXAMPLE**' shows a preview of what this design would look like printed with silver foil.
- > The '**FOIL**' layer is set up with only the intended foil areas. These areas must be pure black. The areas not being foiled can be left transparent or white in this layer.
- > The '**ARTWORK**' layer contains the rest of the design not being foiled and is missing the areas which will be foiled.
- > Make sure any important text or graphics are within the blue **SAFE AREA**.
- > When finished, save as a 300dpi CMYK layered file in **PDF, PSD or AI format**.
- > For multiple designs please save each design as a separate file.
