

CUSTOM SHAPE

HOLO/PRISM AND METALLIC STICKER

100MM BASE

EXAMPLE DESIGN
Replace with your design!

INSTRUCTIONS

- > Place artwork onto the **ARTWORK** layer.
- > Create your cut path in the **CUT LINE** layer.
- > Use a **Magenta 1** pixel stroke to indicate cut line.
- > Convert text to outlines (Click 'Type' > Create Outlines)
- > All artwork should be 3mm away from bleed edge. We can't print to the edge as the stock curls so you will be left a 3mm border after the bleed edge.
- > If you require white underbase place any elements you want printed white in the white artwork layer. This means the stock would not be visible in these areas.
- > If using black, please use Rich Black (C60 / M40 / Y40 / K100)
- > When finished, save as layered file.
- > For multiple designs please save each design as a separate file.
- > Upload final files before checkout.

3MM BLEED
